The Samaya Seminyak Supports The Earth Day

Bali, April 23<sup>rd</sup> 2016

To honour the earth day as well as doing the Corporate Social Responsibility program, on April 22<sup>th</sup> 2016 The Samaya Seminyak held a program called “Little Things to Support The Earth” which was participated by management and staff of representatives from all departments.

The program was begun at 07.00 am with an interesting short training of making compost from gardener team. The process of composting started with chopping the dried leaves into smaller pieces then they were put into a container. A liquid which has active organism was added to speed up the composting process. After 2 or 3 weeks, the compost will have dark brown colour and smell nice and earthy. It means it is ready to use.

The program then continuing with planting some plants; for instance *Dadap (Erythrina lithosperma Bl. non Miq)*, *Pandan Wangi (Pandanus ammaryllifolius)* and *Kayu Tulak*; which are commonly used as the part of Hindu’s ritual paraphernalia as well as cleaning the area around

the hotel temple. Last but not least was the distribution of recycling shopping bags to the participants which purposed to reduce the use of plastic bags. (smy/sh)
